Career Summary

- Full Stack Software Developer with more than 6 years of experience in software development using Java Technologies such as *Java 8, Spring Boot, JPA, Spring Framework* following Object Oriented Programming (OOP).
- Extensive experience working in the Agile Methodology environments like Scrum.
- Experience in working with Relational DBMS like *Oracle*, *MySQL*, and *PostgreSQL*.
- Develops microservice applications using *Spring Boot* and *Docker*, and use *Apigee* for API Management Tools.
- Performs software development from the ground up, environment setup, server setup and configuration, system deployment.
- Front-end development experience using HTML5, CSS3 with *Bootstrap* and *MaterializeCSS*, and popular JavaScript Frameworks such as *Angular, Vuejs, Reactjs, Typescript* for creating a mobile-responsive web application that follows industry's standards.
- Capable of dealing with new technologies.
- Effective team player that has great interpersonal skills.

Skills and Proficiencies

- Java
- Spring Boot
- Microservice Architecture
- RESTful API
- Spring Data(JDBC, JPA)
- Maven
- APIGEE
- Swagger
- MyBatis

Database Management Systems
- MySQL
- PostgreSQL
- Oracle

Software Development Life Cycle(SDLC) Methodologies
- Agile(Scrum)
- Waterfall

Web Development
- HTML5
- CSS3(Bootstrap, MaterializeCSS, SASS/SCSS)
- JavaScript(Angular, ReactJs, VueJs, jQuery, NodeJs, Typescript)

Version Control Systems
- SVN
- Git(Gitlab,Bitbucket)

Unit Test and Integration Tools
- JUnit
- Mockito
- Docker

Platforms
- Windows
- Ubuntu

Professional Experience

Novare Technologies Inc., Bonifacio Global City, Taguig, PH
Senior Software Engineer
September 2018 – January 2022

Projects involved as a Senior Software Engineer:

1. Partner Subscription Portals and APIs – Globe Telecom
   Tech Stack: Java, Thymeleaf, Node JS, Nginx, Spring Boot, JPA, Mysql
2. Order Management Portal and APIs – Globe Telecom
   Tech stack: Java, Angular, JHipster, REST, Springboot, JPA, Mysql, Bitbucket
3. Personal Online Banking for Web – BDO UniBank, Inc.
   Tech stack: Java, Angular, Docker, REST, Springboot, Maven, JPA, Mysql, Bitbucket, SonarLint, TRELLO, JIRA
4. Microservice APIs for Online Banking – BDO UniBank, Inc.
   Tech stack: Java, APIGEE, Docker, REST, Springboot, Maven, JPA, PostgreSQL, JOOQ, Mysql, Rest-Assured, Bitbucket, SonarLint

Responsibilities and Tasks:
- ❖ Developed and designed Java applications from the ground up using microservice architecture.
- ❖ Reviewed source code changes to ensure code quality standards are met.
- ❖ Spearheaded the architecture design and development for the Personal Online Banking App using Java and Angular.
- ❖ Lead the front-end development by helping establish coding standards for the team.
- ❖ Created technical documents like IFS, Support Guidelines, Sequence Diagrams and etc.
- ❖ Collaborated with clients to define solution requirements.
- ❖ Worked with software development and testing team members to design and develop applications that meets client requirements on functionality, scalability and performance.
- ❖ Implemented agile methodology and strictly adhered to the Scrum ceremonies during development to achieve goals set every Sprint.
- ❖ Helped mentoring junior developer team members, teaching skills in software development and working to improve overall team performance.
- ❖ Provided technical support to the testing team and beta users.

Professional Experience

Pointwest Innovations Corporation, UP-AyalaLand Technohub, Quezon City, PH

Software Engineer

July 2015 – July 2018

Projects involved as a Senior Software Engineer:

1. Customer Service Dashboard Platform – Taiwanese Banking Company
   Tech Stack: Java, ReactJs, Spring Boot, JBoss, d3Js, Maven, Mysql
2. Shipping Reservation Digital Platform – Shiptek Solutions Corp
   Tech Stack: Java, Spring Boot, Angular, PusherJs, VueJs, NodeJs, Mysql, Amazon Web Services EC2, Laravel, PHP
3. Workforce Planning Demand Capture – Company Application
   Tech Stack: Java, Spring Boot, Angular, ngx-bootstrap, Google oAuth2.0, Mysql
4. Learning Management System – Company Application Tech Stack: Java, Spring MVC, MyBatis, MySQL, Apache Tomcat 8, PayPal Integration, MaterializeCSS
5. Credit Redemption Insurance System – AFPSLAI
   Tech Stack: Java, Struts2, Apache Tomcat, Apache POI, jQuery, AJAX, OracleSQL bootstrap

Responsibilities and Tasks:
- ❖ Developed and designed Java applications from the ground up using different architecture types such as monolithic and microservices.
- ❖ Reviewed source code changes to ensure code quality standards are met.
- ❖ Created an in-app chat for Shipping Reservation App using VueJs, Node and a 3rd party app PusherJs.
- ❖ Responsible for collaborating with client's tech representative during testing and deployment in UAT and Prod environments.
- ❖ Presented and demonstrated products to clients and stakeholders.
- ❖ Managed and helped the agile development team with their deliverables to develop and test.

Trainings

Google Apigee Training (September 11 -24, 2019)

Education

Polytechnic University of the Philippines – Sto. Tomas Batangas Branch

Sto. Tomas City, Batangas, PH

BS Electronics and Communications Engineering

April 2013

Registered Electronics Engineer (December 2013)
